

To whom it may concern: I am writing to document my support for the benefits I receive from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Market forces have shown here is a demand for continuous traffic and weather coverage and this is not available via land-based broadcast radio. If these businesses are concerned about audience shift to satellite radio due to a unique service, they should try to compete in the market - not the courts. I respectfully urge the FCC to reject the NAB's petition 04-160 and I support satellite radio's ability to provide the kind of programming that I desire.
